Code	Height H (mm)	Length L (mm)	Width (mm)	N. tubes	Power W	Weight (kg)
analog thermostat version, without plug						
OSNDCL1080845N3	890	450	30	14	300	8,8
OSNDCL1011150N4	1207	500	30	21	400	14,2
OSNDCL1011160N5	1207	600	30	21	500	16,2
OSNDCL1011760N7	1822	600	30	34	700	25,9

The electric output is equal to the thermal output at operating mode.

Technical characteristics

- Pipes diameter 25 mm
- Pipes distance 41 mm
- Semi-oval collectors 40X30 mm
- Mains electricity supply: 230 V AC, 50Hz
- Class 2, IP 34

Included in the packing

- Kit of 3 brackets included in the packaging
- Instructions included
- Remote control

Functions

Electronic thermostat with manual temperature regulation ring.

- Two hour override function: when this function is activated, the radiator operates at maximum power for two hours to heat the room rapidly.
- Freeze prevention function: when the dial is on minimum, the towel warmer comes on automatically when room temperature drops below 7°C.

Electric installation

- The radiator must be installed outside zone 1 (bathroom)
- The switch/electronic control must be in zone 3 (bathroom)
- For safety reasons, the radiator must not be installed beneath a mains socket
- Turning a towel warmer by 180° is not possible
- Every towel warmer has to be installed frontally, and the thermostat has to lie on the lower-right position

Special version

- Elegance Linea hot water: available in the Towel Warmers section
- Chromed version: available
- Coloured version: a standard coloured version is not available. However, the hot water version is available in coloured version with mixed electrification kit (see the hot water version in the Towel Warmers section)
- Room divider fixing kit: not available
- Remote control: available

— OPTIONAL —

Brackets
